

Newsletter

Edition 1 / February 2019

Our customers

The migration of our existing customers from the Webentry application to our new digital eFreight Platform has been completed successfully.

Thanks to additional resources working at our Basel headquarter, we can offer in the near future on an even faster service for configuration and new interfaces.

Customers can now benefit from our new consulting resources. The checklist and gap analysis instruments we developed, enable us to demonstrate the benefits of digitizing the logistics processes.

About us

The efreight team is constantly growing to meet the needs of the market. The successful implementation of our eFreight Platform is the basis to inspire new customers to join our digital community in the future.
